International Future Energy Electronics Conference 2013 (IFEEC 2013) will be held in Tainan, Taiwan on November 3-6, 2013. This conference is an international forum for presentation and discussion of the state of the art technology in Energy Electronics and related topics. Papers presented in the conference will be included in the IEEE Xplore Digital Library. Owing to the inevitable global resource crisis, IFEEC 2013 is mainly focused on the topics of energy-saving systems, renewable energy, energy storage, novel topology for converters and inverters, lighting, innovative analog and digital controls, and the applications not limited to the aforementioned topics.

- Converters
- Power converters for renewable energy systems and utility interfaces
- Machine design
- Motor drives
- Devices and components
- Power integrated circuits
- Lighting technologies and applications
- Power electronics applications

Note:

IFEEC has applied for Ei Index.

The digest is a summary of your paper including the digest title, abstract, digest text and references. Maximum 6 pages. The digest should not be a cropped version of the full paper.
